1) Data coverage for euro area residents is estimated at around 95% of total issuance.

2) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more one year away, or with indefinite maturity dates, are classified as long-term.

3) Monthly averages of the flows during this period.

4) Annual growth rates are based on financial transactions that occur either when an institutional unit acquires or disposes of financial assets, or when it incurs or repays liabilities.

The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.
