NOTES TO TABLES

- 1) The data in these tables represent amounts recorded at the end of period, with the exception of the number of employees of credit institutions in Table 1 in which the average number in the period is in question.
- 2) These data as well as EU and euro area aggregates up to 2009 are available in the Statistical Data Warehouse (<http://sdw.ecb.europa.eu/browse.do?node=9484387>).
- 3) The Herfindahl index (HI) refers to the concentration of banking business. The HI is obtained by summing the squares of the market shares of all the credit institutions in the banking sector. The exact formula according to which data must be transmitted to the ECB is reported in the ECB Guideline on monetary financial institutions and markets statistics (recast), (ECB/2007/9).
- 4) Where the number of institutions is less than three, the underlying data are not disclosed for confidentiality reasons.
- 5) For Sweden total assets under management by pension funds include estimates of the occupational pensions managed by life insurance companies for the period 2006.
